Scrum 3

Team Vecna

November 29, 2022

Team Members

- Arika Pasha
- Bulbul Arora
- Faizah Kolapo

Recap

- All of us have witnessed food being wasted at restaurants that could be going to people in need. So, we decided to implement something that would be of great help to shelters in Regina.
- Creating a PWA that will connect businesses and shelters on one platform without minimal effort.

Status

- Yellowish
- Front-end development is complete (HTML, CSS and React).
- Database has been created.
- Back-end code has been partially written(authentication) but we're still having trouble getting it to work.
- Got industry feedback for our hi-fi prototypes.
  - Restaurant: Local indian restaurant in Calgary
  - Shelter: Search Clinic
- All documentation is complete.

Project Issues

- We are having some trouble connecting our client side to the server side. (specific library we're having issues with - axios.)

Project Changes

- Changing the color scheme to something along the lines of purple.

Documentation

- https://github.com/bulbularora/No-More-waste/tree/main/Code/no-more-waste/src
- https://sea-turtle-app-8pyey.ondigitalocean.app/

Next Up

- Connect the client side with the server side.
- Adjust the CSS.
- Work on the track requests and coding for the volunteer side.
- Look into APIs for notifications(Twilio).
- Look into how to incorporate the chat feature.
- Meet up with Karim to get help on Node.js.
- Work on the responsiveness.

Team Reflection

- Does the team feel on track?
- What progress do we feel great about?
- What barriers do feel are a current impediment to success?
- What help do we require to move positively forward?
- What questions or concerns do we have?
